Education

Faculty of Management Studies, University of Delhi

2024 - 2026

in

Master of Business Administration (MBA)

Sardar Patel Institute of Technology, University of Mumbai

2016 - 2020

in

Bachelor of Engineering (BE) in Electronics & Telecommunication Engineering

- Secured ₹5L grant from Department of Science & Technology (Govt. of India) and NSRCEL (IIM Bangalore) incubator; filed 3 provisional patents for an IoT product, ranking as a Top 60 Finalist team nationally among 100k+ applicants.
- Led a 4-engineer pod to build a robotic platform, placing 5th out of 35 national finalists at the Mitsubishi Electric Cup; secured ₹2L+ in corporate hardware sponsorship and advanced PLC/HMI training to execute the integration.

Experience

Management Consulting Analyst Intern

Bengaluru, IN

Accenture Strategy

Apr 2024 – May 2024

- Architected a stateful multi-agent orchestrator prototype using LangGraph and LangChain to simulate the end-to-end migration of a legacy Genesys IVR network to Dialogflow CX for a Fortune 10 Global Healthcare Enterprise.
- Implemented an **Orchestrator-Worker pattern** running Chain-of-Thought (CoT) and few-shot prompting over multi-LLM router pipelines (via OpenRouter), successfully mapping ~70 high-frequency, complex healthcare journeys onto intelligent conversational steering bots.
- **Engineered an automated data extraction and ingestion pipeline** during a pre-signing client data freeze, scraping 100+ public enterprise URLs and unstructured policy PDFs to bypass operational project blockers.
- Deployed **semantic and paragraph-based chunking protocols** using LangChain to populate a low-latency ChromaDB vector database, providing a robust, ground-truth knowledge layer for context-aware RAG retrieval.

Senior Digital Engineer I

Mumbai, IN

Tata Neu

Sept 2020 – June 2024

- Led a 3-engineer pod to architect Cart and Checkout journeys with a hybrid Croma payment integration, driving a ~47% landing-to-checkout conversion increase and processing 14K+ weekly orders
- Spearheaded Adobe Experience Manager (AEM) and React integration, decoupling frontend rendering from backend logic, cutting content delivery from days to minutes and empowering product teams to autonomously run A/B tests.
- Engineered aggressive WebView preloading and pre-rendering architectures within the Flutter superapp, eliminating browser engine cold starts and reducing Time-to-Interactive (TTI) by up to 70%.
- Fast-tracked for the Tata Administrative Services (TAS) flagship leadership program; shortlisted for the final Chairman's Group Discussion among 80+ top-performing internal candidates.
- Engineered the 'My Orders' frontend module as sole owner, scaling it to a top-5 most visited page during the 800K+ user rollout; earned 'The Spark' Award and 'Exceptional Achiever' rating for ranking in top 3 out of 250+ contributors.
- Architected onboarding frontend (Signup, Profile, Address) in ReactJS and Redux for Tata Neu superapp, accelerating the launch and establishing infrastructure to support 120Mn+ users.
- Architected NextJS, MobX, and Sanity CMS for Tata Neu's flagship electronics vertical, unifying reference architecture adopted by 5+ cross-functional pods to accelerate feature integrations.

Founding Experience

Co-Founder

Jan 2018 – Aug 2020

Zargun Electronics and Science Pvt. Ltd.

Directed product engineering from inception to MVP launch (June 2018 – Aug 2020) before transitioning to a strictly non-operational advisory role; appointed as Director during corporate restructuring from OPC to Pvt. Ltd. in May 2021.

- Pioneered a handheld micro-spectrometry sensor utilizing optical spectroscopy to precisely classify post-consumer polymers (HDPE, PET, PP), successfully bypassing the high error rates of standard Computer Vision models.
- Architected a modular, ultra-low-power IoT ecosystem ("Smart Kit") featuring in-house custom PCB design and interchangeable sensor payloads (3V3–12V), enabling horizontal scaling across waste, compost, and material sensing.
- Built a real-time GIS analytics and logistics dashboard leveraging AWS (EC2, Lambda) and an event-driven architecture (Kafka, MQTT) to process continuous hardware telemetry into automated dispatch routing.
- Recognized globally as a Top 15 enterprise (out of 41 teams across 16 nations) at the Singapore International Foundation's Young Social Entrepreneurs 2021 accelerator, receiving mentorship from McKinsey and Temasek Int.
- Secured over \$44K in seed grants, via the MeitY STPI CHUNAUTI challenge, alongside strategic victories at the IITB-SJMSOM Pitch 2.0, NXP India Tech Startup Challenge (Top 10), and Maharashtra Startup Week (Top 100).

Projects

FlashInfer

Jan 2023 – present

Open-source library for high-performance LLM inference kernels

- Achieved 2.8x speedup over baseline attention implementations on A100 GPUs
- Adopted by 3 major AI labs, 8,500+ GitHub stars, 200+ contributors
